PROFESSIONAL SUMMARY

Software Developer with experience building full-stack web applications and interactive Power BI dashboards. Worked with React, JavaScript, SQL, Git, and modern frontend tools to develop responsive interfaces and data-driven solutions. Interested in software engineering, artificial intelligence, and data analytics, with a focus on building practical applications that solve real-world problems.

EDUCATION

JECRC University, Jaipur

B.Tech – Computer Science & Engineering | CGPA: 9.01/10

Jaipur, Rajasthan, India

2024 – 2028

PROJECTS

Portfolio Website ([GitHub](#)) ([Live](#))

- Developed a modern, responsive portfolio to showcase technical projects, skills, and achievements.
- Integrated Email-JS for direct communication and resume download functionality.
- Deployed on Vercel with an optimized, mobile-friendly interface.
- Outcome: Created a centralized online portfolio that strengthens professional presence and makes projects, resume, and contact information easily accessible to recruiters.

Tech Stack: HTML • CSS • JavaScript • Email-JS • Vercel

Spotify Analysis Dashboard ([GitHub](#))

- Built an interactive Power BI dashboard to analyse Spotify streaming trends.
- Developed DAX measures and dynamic filters for artist, album, and listening insights.
- Outcome: Enabled quick identification of listening patterns, top-performing artists, and user engagement trends through interactive visualizations.

Tech Stack: Power BI • DAX • Power Query

Blinkit Sales Dashboard ([GitHub](#))

- Built an interactive sales dashboard to monitor revenue, orders, and outlet performance.
- Created KPI cards and dynamic filters for business analysis.
- Outcome: Provided a centralized view of sales performance, enabling faster analysis of business metrics and operational trends.

Tech Stack: Power BI • DAX • Power Query

Country Comparison Dashboard ([GitHub](#))

- Designed a Power BI dashboard comparing six countries across education, crime, GDP, poverty, and CO₂ emissions.
- Implemented interactive filters and comparative visualizations.
- Outcome: Enabled users to compare multiple socioeconomic indicators in one dashboard, making cross-country analysis faster and more intuitive.

Tech Stack: Power BI • DAX • Power Query

AI-Powered Chatbot ([GitHub](#))

- Developed a terminal-based AI chatbot in Python using the Groq API to generate context-aware responses through Large Language Models (LLMs).
- Integrated secure API communication and implemented prompt handling to enable dynamic, real-time conversations.
- Structured the application with modular Python code for maintainability and future feature expansion.
- Outcome: Demonstrated practical implementation of LLM APIs by building an interactive conversational assistant capable of handling general user queries.

Tech Stack: Python • Groq API • LLM • REST API • Git • GitHub

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js

Data Analytics: Power BI, DAX, Power Query

CS Fundamentals: Data Structures and Algorithms, Operating Systems, Computer Networks, Computer Organisation

Tools: Git/GitHub, Figma, VS Code, Jupyter Notebook, Salesforce Admin

CERTIFICATIONS

- Smart India Hackathon 2025 – Participant
- Data Analysis & Visualization with Power BI – Microsoft (Coursera)
- Version Control – Meta (Coursera)
